

CP-Connectivity QlikView / Qlik Sense

Installation Notes

Standard Recommendations for Hardware and Software

Please note!

Depending on the application of the software (structure size, number of users, calculations within the structure), the hardware configuration which is actually required may vary from this recommendation. We will be happy to assist you in the planning of your project-related system environment. On request, the installation can be carried out as a service of CP Corporate Planning AG. For complex IT environments, we also offer a technical workshop as preparation for the installation.

Standard Recommendations for Hardware and Software

An up-to-date operating system patch status is prerequisite for all installations.

- Windows 11, Windows 10
- Processor with 4 cores
- 4 GB RAM
- 20 MB disk space is required for the installation
- QlikView / Qlik Sense in the latest version
- Windows Installer 4.5
- Microsoft .NET Framework 4.8
- Installation in Citrix environments supported from Citrix XenApp Version 5.0

For a detailed description of the installation please refer to the [Technical Manual](#).

General Notes on Installation

All installations require **Administrator rights**. CP-Connectivity QlikView / Qlik Sense must be installed on every computer on which the integration should be available.

You will find the respective setup on the installation DVD in *[DVD]:\Setups\Extensions* in the directory named:

- CP-Connectivity QlikView
- CP-Connectivity Qlik Sense

The Setup Wizard guides you automatically through the installation. At the start of the installation, a list of all missing software-related system requirements is displayed. All essential system requirements will be installed automatically.

When the required components have been installed, you may need to restart the system, in which case you must do so before continuing with the CP-Connectivity QlikView / Qlik Sense installation.

Accept the terms in the licence agreement in order to finish the installation. On completion of the installation, the **CP-Connectivity QlikView / Qlik Sense** integration is available.

Modifying / Repairing an Installation

It is only possible to modify an installation or carry out a repair installation by running the setup again. Having done so, select the "Modify" or "Repair" option and follow the instructions of the Installation Wizard.

Changing or repairing the installation via the Windows Programs and Features is disabled at present.
